

GUY WIRE INSTALLATION

Installation des haubans | Instalación de los cables de sujeción

If attaching guy wires to Z-purlins, use the Z-Purlin Guy Wire Attachment Kit (part number 003765-01 or 003765-02).

Si vous fixez des câbles d'ancrage à des pannes en Z, utilisez la trousse de pose de câbles d'ancrage pour panne en Z (numéro de pièce 003765-01 ou 003765-02).

Si conecta cables de sujeción a correas en Z, utilice el kit de conexión de cables de sujeción y correas en Z (número de pieza 003765-01 o 003765-02).

Over-tightening guy wires could throw fan off balance. Maintain a distance of 6 to 8 in. (152 to 203 mm) between Gripples and carabiners.

Des haubans trop tendus peuvent déséquilibrer le ventilateur. Ménagez une distance de 152 mm à 203 mm (6 po à 8 po) entre les tendeurs Gripple et les mousquetons.

Si ajusta excesivamente los cables de sujeción, el ventilador puede quedar desbalanceado. Mantenga una distancia de 6 in. a 8 in. entre los Gripples y los mosquetones.

SPANNDRAHTINSTALLATION

Wenn Sie Spanndrähte an Z-Pfetten befestigen, verwenden Sie den Z-Pfetten-Spanndrahtbefestigungssatz (Teilenummer 003765-01 oder 003765-02).

4. DRAHTSEILKLEMMEN

Wenn die Spanndrähte zu stark festgezogen werden, kann dadurch der Lüfter aus dem Gleichgewicht geraten. Halten Sie einen Abstand von 152–203 mm (6–8 Zoll) zwischen Gripples und Karabinerhaken ein.
